

**SBEL/WACC Brown Bag Seminar
Thursday 9/11 at 2PM
In room 2046ME**

Four Presentations on Recent Internships:

1) Omkar Deshmukh: “Continuous deployment of kernel and hypervisor packages”

Description: Automated software delivery for linux kernel and xen hypervisor packages provisioned on AWS EC2 instances

2) Arindam Sinha: “An overview of the Denver CPU architecture in Tegra devices.”

3) Dan Melanz: “Results of Chrono validation,”

Description: In this talk, I will summarize the results I have obtained in the validation of Chrono when used in conjunction with granular material testing.

4) Felipe Gutierrez: “The Software Engineer Roles in UX at Microsoft”

Description: During my "Explorer" internship at Microsoft I was exposed to the three different software engineer roles at Microsoft: Developer, Program Manager and Tester. I will be talking about the general duties these roles are in charge of in a UX team at Microsoft, as well as my learning experience.
